You don't need to know anything about autism or ADHD.

You just need to ask.

Interview Your AuDHD Grandchild is a keepsake book that grandparents and grandkids fill in together. Page by page, your grandchild shows you how their world works: what calms them, what's too much, what lights them up, and what they wish grown-ups understood.

It's not a guide and it's not homework. There's no jargon, every question can be skipped, and kids can answer by talking, drawing or pointing.

Made for grandkids ages 6 to 14 who are autistic and ADHD, or still finding out.

★ Get to know them. Straight from them.
